01 / PERMISSION AND SETUP

Scope sheet

Print this sheet or use the editable Markdown/CSV templates. Keep secrets and personal data out.

Owner / authorized tester / permission reference

App and exact allowed backend hosts

Excluded services / permitted actions

Test window / request budget / concurrency

Disposable accounts and fictional record owners

Spending controls / backup / rollback / contact

Stop conditions / evidence retention / credential revocation

02 / RECORD THE RESULT

Evidence sheet

Print this sheet or use the editable Markdown/CSV templates. Keep secrets and personal data out.

Finding ID / feature / tested version and date

Active account and role / record owner / expected rule

Exact action or request, with secrets removed

Expected result and observed result

Smallest proof / directly supported business consequence

Status / ease and consequence ratings / rating reason

Recommended repair / assigned owner / remaining uncertainty

03 / VERIFY THE REPAIR

Retest sheet

Print this sheet or use the editable Markdown/CSV templates. Keep secrets and personal data out.

Finding ID / repair version / reviewer and date

Original forbidden action repeated with the same inputs

Forbidden action blocked: exact observed evidence

Normal owner action still works: exact evidence

Related routes checked / remaining gaps

Disposable records cleaned up / temporary access revoked

Production verification (if authorized) / next review date
