

YOUR OWN JEV

A practical starting point for building a small AI specialist.
Explore the example. Get the code. Make it your own.

01 SEE HOW IT WORKS

Try the travel agency. Choose **The flexible escape** • 2, check Maya, then remove the Approach photo and check again. Her result changes from decline to review.

[TRY THE SAMPLE](#)

02 GET THE PUBLIC CODE

Open the starter repo for the sample app, small labeled dataset and training recipe. Follow its README to prepare, measure a baseline, train and test in a new workspace.

[OPEN PUBLIC GITHUB](#)

03 BUILD YOUR VERSION

Open **TRAIN-MY-SPECIALIST.txt** in your download. Replace the bracketed task fields, then give it to Claude or your coding assistant. Ask for actual saved outputs at each step.

Know what you are running. The browser demo uses recorded model observations; your choices update application rules. The starter trains a separate educational model. Its tiny sample is a pipeline check, not the video's V2 benchmark.

BUILD YOUR OWN VERSION WITH US.

Get the complete code, training pipeline, checkpoints and exclusive training inside Early AI Adopters.
