

How to Implement Generative AI in Your Business in 2025

An End-to-End Roadmap for Adoption and Optimization

Foundational Constraints

Security Considerations

- How much safety do you need?
- Is it "we need to use local models" safety, or we can use ChatGPT Yams Safety?

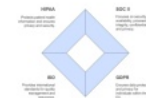

Compliance Requirements

What type of compliance do you need to adhere to?

SOC 1? GDPR? ISO? HIPAA?

... everything?!

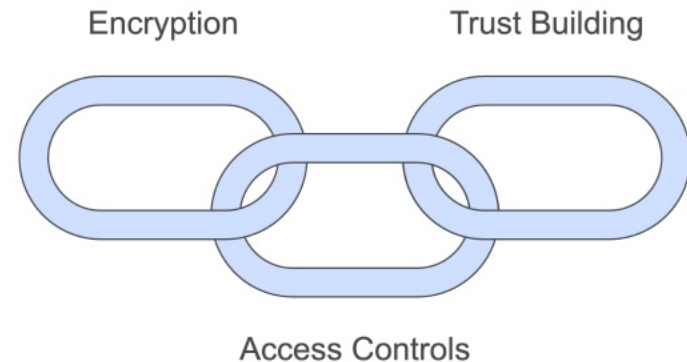

Budget Limitations

- It's **super cheap** to start
- It can be **super expensive** to scale
- A final product is rarely **final**
- All costs will go down towards **zero**... eventually

Security Considerations

- How much safety do you need?
- Is it '**we need to use local models**' safety, or we can use **ChatGPT Teams** Safety?

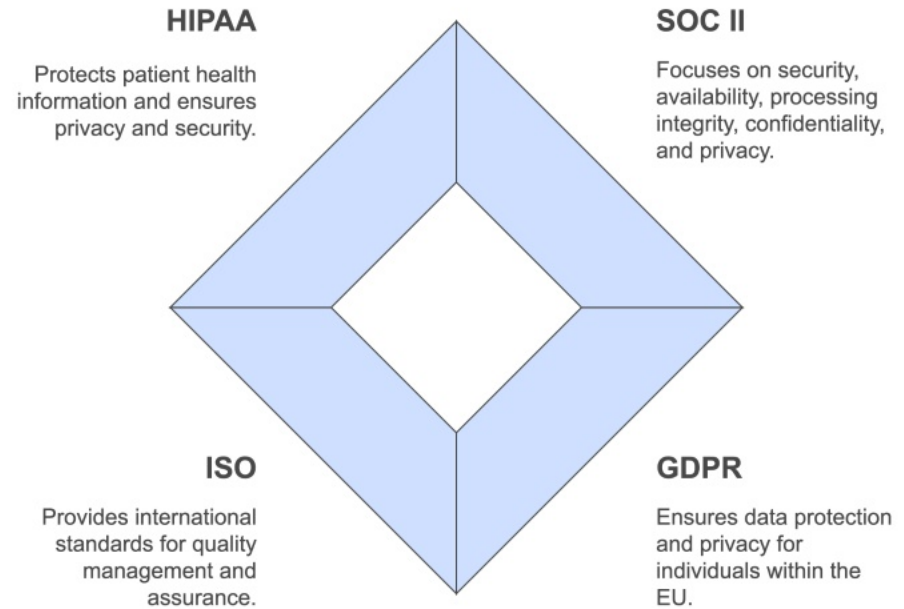

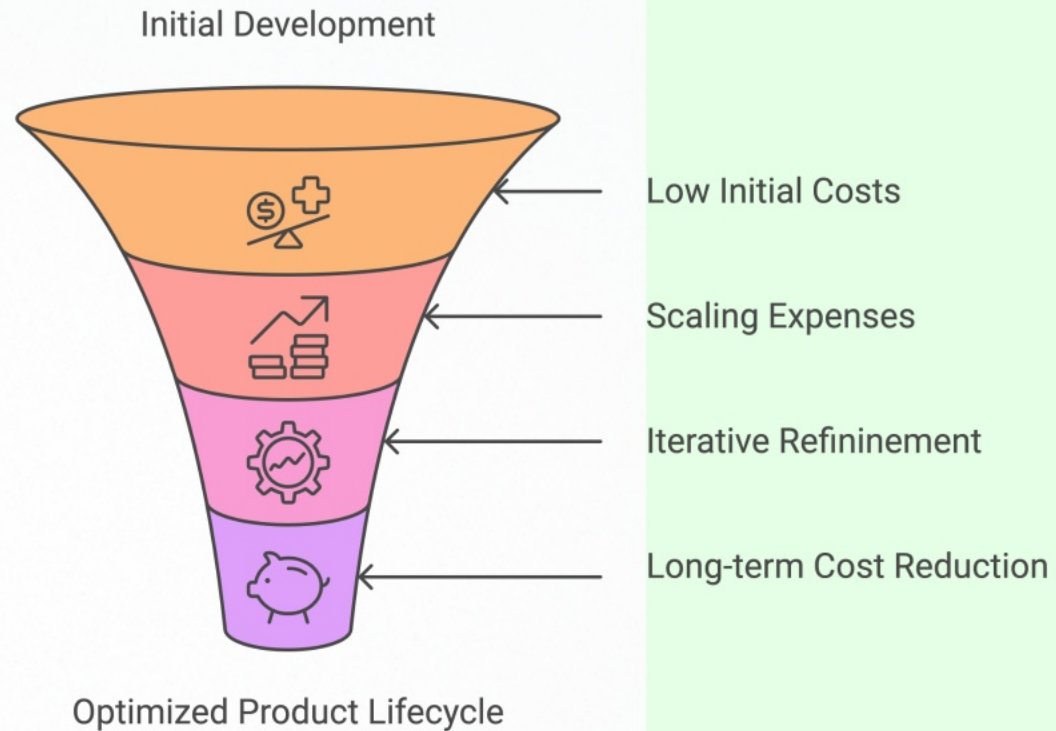

Compliance Requirements

What type of compliance do you need to adhere to?

SOC II? GPDR? ISO? HIPAA?

... everything?!

Budget Limitations

- It's **super cheap** to start
- It can be **super expensive to scale**
- A final product is rarely '**final**'
- **All costs will go down towards zero...** eventually

How to Implement Generative AI in Your Business in 2025

An End-to-End Roadmap for Adoption and Optimization

Identifying Business Pain Points

Identifying Core Constraints

- Decide whether you care more about **revenue-generating** or **cost-saving**.
- What is the most **low-level** task with the **highest leverage**?
- Momentum** is more important than 'the big win'.

The Bigger the Constraint, the Bigger the Payoff

- What is the **quickest way** to get team buy-in? (or yourself?)
- Focus on top 2-3 constraints:** overwhelming 'loadflow', disparate knowledge, no lead follow-up, nurture, segmentation

Defining the Path Forward

- Changing mindset from 'It's done' to **this iteration is completed**
- I've never seen a generative AI project with no iterations -- things will continue to evolve, and so should the solutions you build
- Create hypothetical **Plan Bs & Plan Cs** to be nimble

Identifying Core Constraints

- Decide whether you care more about **revenue-generating** or **cost-saving**
- What is the most **low-level task** with the **highest leverage**
- **Momentum** is more important than 'the big win'

Choose the best strategy for business success

Revenue-Generating

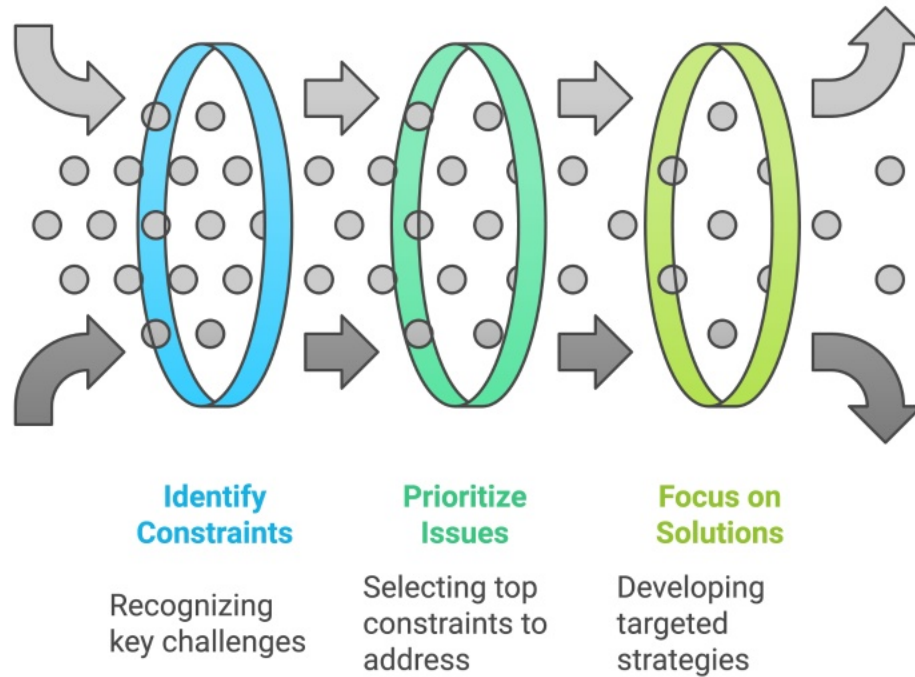

Maximizes income potential

Cost-Saving

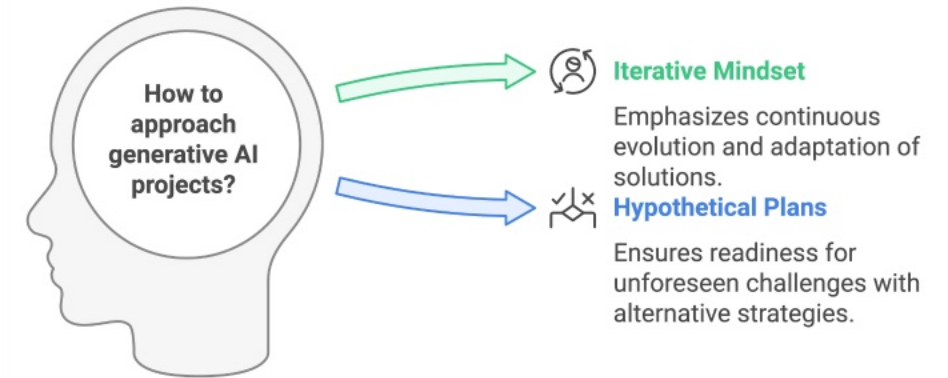

Enhances efficiency and profitability

The *Bigger* the Constraint, the *Bigger* the Payoff

- What is the **quickest way** to get team buy-in? (or yourself)
- **Focus on top 2-3 constraints;** overwhelming leadflow, disparate knowledge, no lead follow-up, nurture, segmentation

Defining the Path Forward

- Changing mindset from '**it's done**' to '**this iteration is completed**'
- I've never seen a generative AI project with no iterations -- things will continue to evolve, and so should the solutions you build
- Create hypothetical **Plan Bs & Plan Cs** to be nimble

How to Implement Generative AI in Your Business in 2025

An End-to-End Roadmap for Adoption and Optimization

BITE Scoring Framework

A bite-sized AI Strategy

BITE is a quick evaluation tool to prioritize AI projects based on four key dimensions:

Business-Criticality
Impact Potential
Time-to-Value
Ease-of-Implementation

Each factor is scored from 1 to 5:
1 = Low
5 = High

Example Scenario

A small consulting firm is overwhelmed by client inquiries.

Potential AI Solution:
A basic Q&A Chatbot.

Scenario	Score	Weighting
Business Criticality	4	Aligns with business goals
Impact Potential	4	Magnitude of project impact
Time-to-Value	4	Speed of delivery impact
Ease-of-Implementation	4	Complexity project execution
Total Score: 16 (16 = 4x4 = 16)		

Planning > Building

- List out your departments, and identify the constraint(s) of each one
- Don't overthink individual use cases
- Overthink the follow-through plan
- Your first few initiatives might take longer... and that's okay

A bite-sized AI Strategy

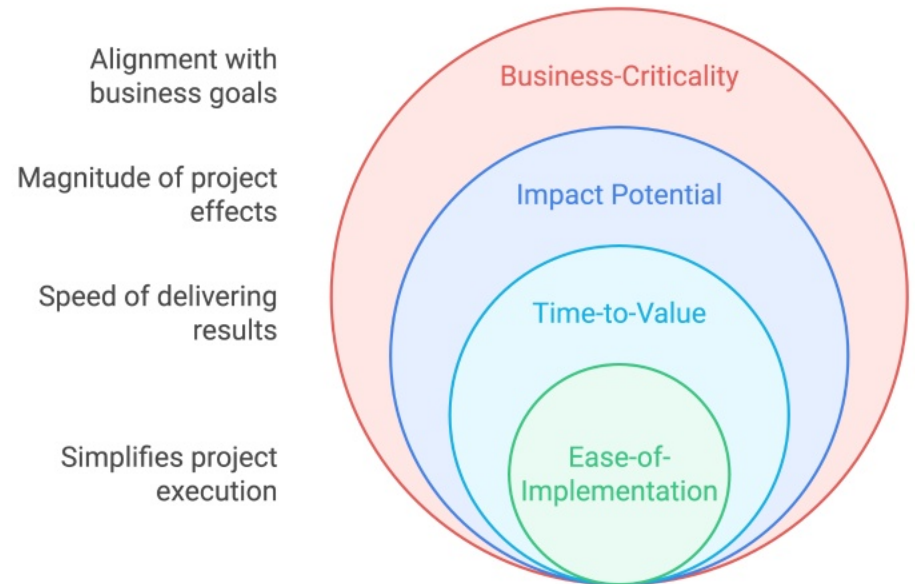

BITE is a quick evaluation tool to prioritize AI projects based on four key dimensions:

Business-Criticality
Impact Potential
Time-to-Value
Ease-of-Implementation

Each factor is scored from 1 to 5:

1 = Low

5 = High

Scorecard:

Factor	Score	Reasoning
Business-Criticality (B)	4	Handling inquiries is central to client experience
Impact (I)	4	Faster responses improve satisfaction & free up team
Time-to-Value (T)	5	A simple chatbot can be deployed quickly
Ease (E)	5	Many ready-made chatbot solutions are available

Total Score: $B(4) + I(4) + T(5) + E(5) = 18/20$

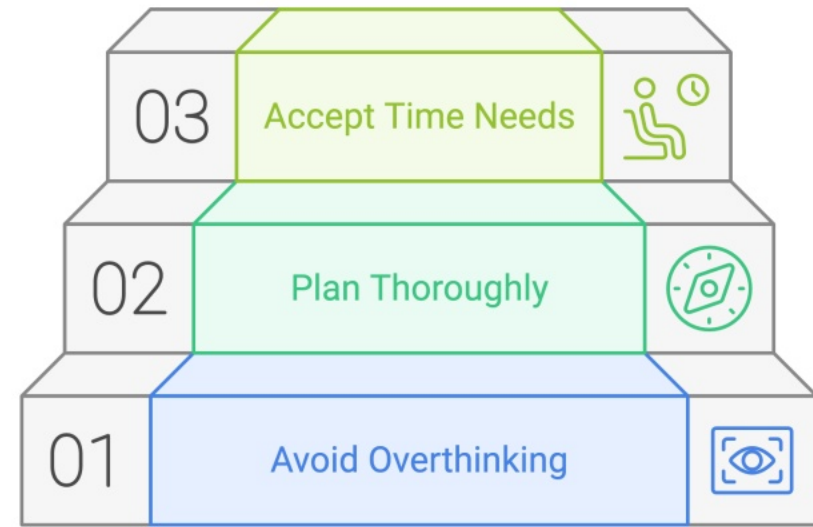

Example Scenario

A small consulting firm is overwhelmed by client inquiries.

Potential AI Solution:
A basic Q&A Chatbot.

Planning > Building

- List out your departments, and **identify the constraint(s)** of each one
- **Don't overthink** individual use cases
- **Overthink** the follow-through plan
- Your first few initiatives might take longer... and that's **okay**

How to Implement Generative AI in Your Business in 2025

An End-to-End Roadmap for Adoption and Optimization

High-Impact Use Cases by Department

Sales & Marketing

- Lead qualification
- Automated outreach
- Ad content generation
- SEO, and the new kid on the block, GEO

Operations & Back-Office

- Document processing
- Knowledge-base queries
- Customer Support (Voice + Chat)
- Appointment Booking
- Lead Nurturing

Legal & Consulting

- Client intake automations
- Contract summaries
- Drafting assistance
- Answering mid-to-level questions

Education & Training

- Upskilling your teams is **one of the highest leverage activities**
- Designating a **Team Tinkerer**
- Lunch & learns to stay up-to-date
- More bodies $\neq$ More money

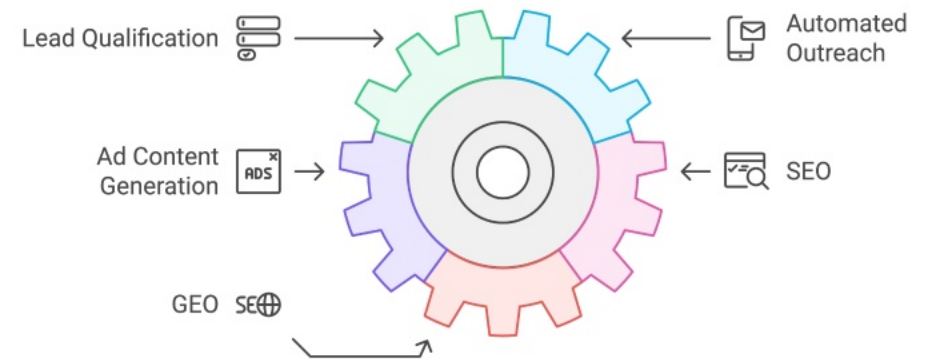

Media & Entertainment

- Image/video generation
- Voice cloning
- Interactive content
- Providing better customer experiences

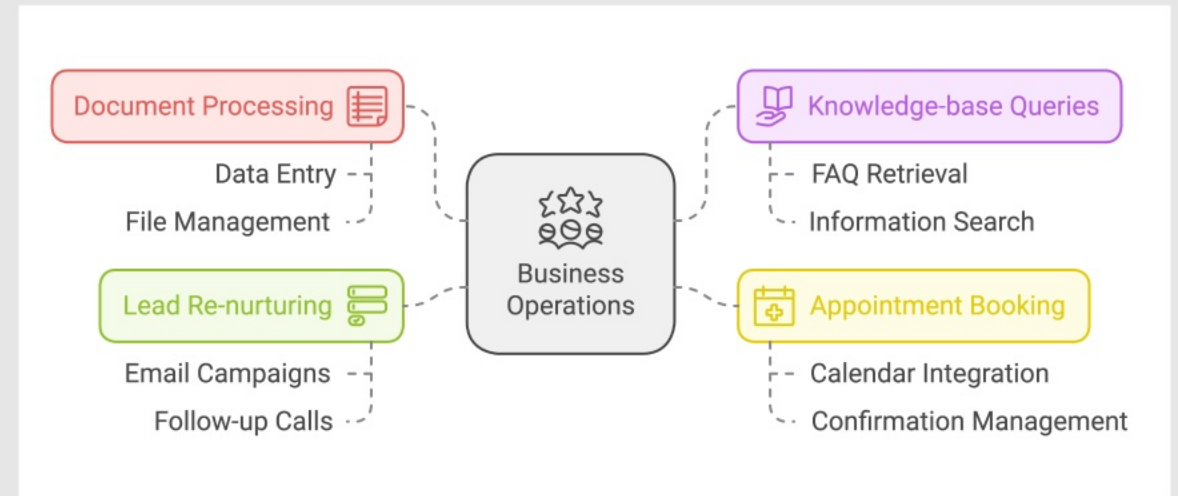

Sales & Marketing

- Lead qualification
- Automated outreach
- Ad content generation
- **SEO**, and the new kid on the block, **GEO**

Operations & Back-Office

- Document processing
- Knowledge-base queries
- Customer Support
(**Voice + Chat**)
- Appointment Booking
- Lead Nurturing

Thanks to WUPPI, now we BARK!

Legal & Consulting

- Client **intake automations**
- Contract **summaries**
- Drafting assistance
- Answering **mid-to-level questions**

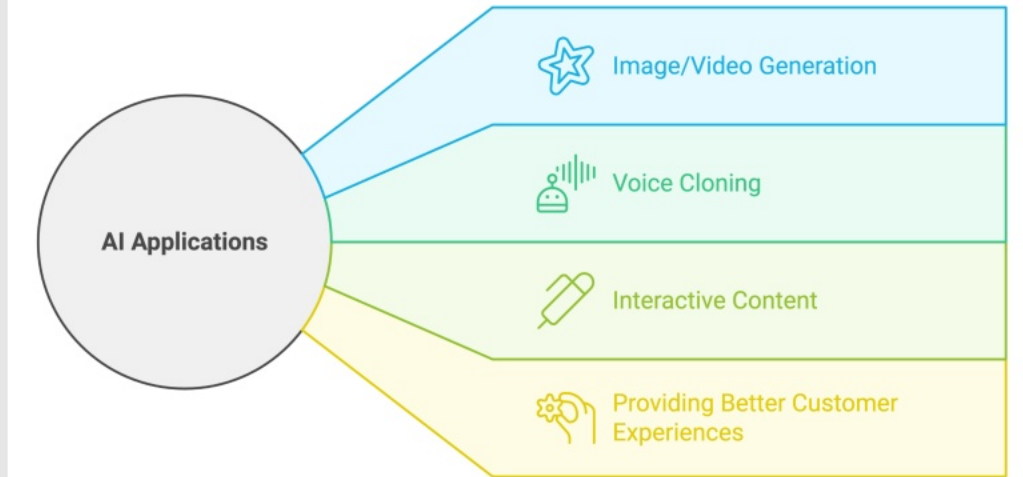

Education & Training

- Upskilling your teams is **one of the highest leverage** activities
- Designating a '**Team Tinkerer**'
- Lunch & learns to stay up-to-date
- More bodies $\neq$ More money

Media & Entertainment

- Image/video generation
- Voice cloning
- Interactive content
- **Providing better customer experiences**

How to Implement Generative AI in Your Business in 2025

An End-to-End Roadmap for Adoption and Optimization

Future-Proofing and Continuous Optimization

There's a tool for almost everything.

THERE'S AN AI FOR THAT™

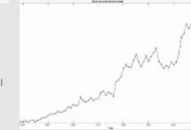

Continuous Learning and Improvement

Establishing a robust feedback loop ensures ongoing adjustments based on performance data and user insights. Encouraging a culture of experimentation promotes innovation and optimizes AI applications continuously.

Measurement and Metrics

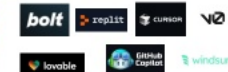

Key performance indicators (KPIs) should be established to gauge AI effectiveness. Regular assessment through these metrics allows businesses to understand ROI and refine strategies, ensuring alignment with corporate goals.

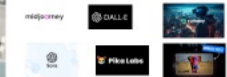

Where do we go from here?
