

Mermaid Cheat Sheet

43 Mermaid Examples

Styles (Looks):

- **Neo:** A modern, sleek style that is now the default for Mermaid diagrams. Ideal for professional and polished presentations.
- **Hand-Drawn (handDrawn):** Uses RoughJS to give diagrams a casual, sketch-like appearance, adding personality and a creative, hand-crafted feel.
- **Classic:** The traditional Mermaid look, maintaining the standard appearance familiar to users.

Themes:

- **mc:** The Mermaid Chart theme, tailored for general Mermaid diagrams.
- **neo:** A theme specifically designed to complement the Neo look, enhancing the modern style.
- **neo-dark:** A dark theme optimized for the Neo look, suitable for dark mode or high-contrast presentations.
- **default:** The standard Mermaid theme, compatible with the classic look.

- **forest:** A green theme that works well with the Hand-Drawn look, giving a natural feel to diagrams.
- **base:** A yellow theme, customizable for users creating custom themes.
- **dark:** A standard dark theme suitable for any look, providing a dark background with light text.
- **neutral:** A theme optimized for printing, offering a black-and-white palette.

Comprehensive Configuration Examples:

1. Neo Look with Default Theme:

This example uses the modern Neo look with the default Mermaid theme.

```

---
config:
  look: neo
  theme: default
---
flowchart TD
  A[Start] --> B[Process Data]
  B --> C{Is Data Valid?}
  C -->|Yes| D[Proceed to Next Step]
  C -->|No| E[Review Data]
  E --> B
  D --> F[End]

```

2. Hand-Drawn Look with Forest Theme:

This example applies a sketch-like hand-drawn style with a green forest theme, suitable for a more creative and natural presentation.

```

---
config:
  look: handDrawn
  theme: forest
---
