

43 Mermaid Examples

Low Complexity Processes:

1. Morning Routine Checklist

Prompt:

"Create a Mermaid diagram in a codeblock for a morning routine checklist that includes steps like waking up, meditating, exercising, showering, and having breakfast."

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

1. Grocery Shopping Planning

Prompt:

"Create a Mermaid diagram in a codeblock for grocery shopping planning, including steps like list-making, categorizing items by store sections, setting a budget, and shopping.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

2. **Weekly Meal Planning**

Prompt:

"Create a Mermaid diagram in a codeblock for weekly meal planning, featuring steps like deciding on meals, creating a shopping list, and prepping

ingredients.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

3. Basic Financial Budgeting

Prompt:

"Create a Mermaid diagram in a codeblock for a basic financial budgeting process that includes setting up a monthly budget, tracking expenses, and making adjustments.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

4. Home Plant Care Routine

Prompt:

"Create a Mermaid diagram in a codeblock to represent a home plant care routine, detailing steps like watering, pruning, and fertilizing on a schedule.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

5. Daily Reading Habit Formation

Prompt:

"Create a Mermaid diagram in a codeblock for forming a daily reading habit, including steps like setting a daily reading goal, selecting books, and scheduling reading time.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

6. Basic Email Management

Prompt:

"Create a Mermaid diagram in a codeblock to illustrate a basic email management process, including checking, categorizing, responding to emails,

and setting up automation filters.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

7. Personal Fitness Plan Creation

Prompt:

"Create a Mermaid diagram in a codeblock for creating a personal fitness plan, detailing steps like setting fitness goals, choosing exercises, and scheduling workouts.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

8. Social Media Content Calendar

Prompt:

"Create a Mermaid diagram in a codeblock for planning a social media content calendar, showing steps like brainstorming ideas, scheduling posts, and

reviewing performance.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

9. Travel Planning

Prompt:

"Create a Mermaid diagram in a codeblock for travel planning, including steps like researching destinations, booking flights and accommodations, and creating an itinerary.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

10. Online Learning Plan

Prompt:

"Create a Mermaid diagram in a codeblock for an online learning plan, detailing steps like choosing a course, setting a study schedule, and tracking progress.

Instructions:

- Do not use ```mermaid in your output.

- So it can be easily copied and pasted into a Mermaid-compatible environment."

11. Decluttering and Organizing a Room

Prompt:

"Create a Mermaid diagram in a codeblock to illustrate the process of decluttering and organizing a room, including steps like sorting items, deciding what to keep, and organizing space.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

Medium Complexity Processes:

1. New Employee Onboarding

Prompt:

"Create a Mermaid diagram in a codeblock for a new employee onboarding

process, including steps like orientation, training schedules, and document submissions.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

2. Event Planning for Small Gatherings

Prompt:

"Create a Mermaid diagram in a codeblock for event planning for a small gathering, showing steps like sending invitations, selecting a venue, organizing catering, and planning activities.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

3. Monthly Marketing Report Creation

Prompt:

"Create a Mermaid diagram in a codeblock to represent the monthly marketing report creation process, including data collection, analysis, and presentation

preparation.

Instructions:

- Do not use ````mermaid` in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

4. Customer Feedback Loop

Prompt:

"Create a Mermaid diagram in a codeblock for a customer feedback loop process, detailing steps like collecting feedback, analyzing data, and implementing improvements.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

5. Personal Development Plan

Prompt:

"Create a Mermaid diagram in a codeblock to illustrate a personal development plan, including steps like identifying skills to develop, setting

goals, and tracking progress.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

6. Small Business Tax Preparation

Prompt:

"Create a Mermaid diagram in a codeblock for small business tax preparation, featuring steps like organizing financial documents, calculating deductions, and preparing tax filings.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

7. Inventory Management for Small Retailers

Prompt:

"Create a Mermaid diagram in a codeblock to represent the inventory management process for small retailers, detailing steps like tracking stock levels, ordering new stock, and managing suppliers."

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

8. Website Content Update Workflow

Prompt:

"Create a Mermaid diagram in a codeblock for a website content update workflow, including steps like identifying outdated content, writing new material, and publishing updates.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

9. Basic SEO Optimization

Prompt:

"Create a Mermaid diagram in a codeblock for a basic SEO optimization process, covering steps like conducting keyword research, updating meta tags, and optimizing content.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

10. Client Project Kickoff

Prompt:

"Create a Mermaid diagram in a codeblock for a client project kickoff process, including steps like initial meetings, requirement gathering, and contract signing.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

11. Product Photography and Editing

Prompt:

"Create a Mermaid diagram in a codeblock to outline the process of product photography and editing, detailing steps like shooting photos, editing them for

quality, and uploading them to an e-commerce site.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

12. Managing a Freelance Project

Prompt:

"Create a Mermaid diagram in a codeblock for managing a freelance project, featuring steps like client communication, setting milestones, delivering work, and processing payments.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

13. Simple E-commerce Order Fulfillment

Prompt:

"Create a Mermaid diagram in a codeblock to illustrate a simple e-commerce order fulfillment process, including steps like processing orders, packing,

shipping, and updating inventory records.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

14. Basic Data Analysis Workflow

Prompt:

"Create a Mermaid diagram in a codeblock for a basic data analysis workflow, covering steps like data collection, cleaning, performing analysis, and visualizing results.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

High Complexity Processes:

1. **Supply Chain Optimization for Manufacturing**Prompt:

"Create a Mermaid diagram in a codeblock for supply chain optimization in manufacturing, including steps like raw material acquisition, production

planning, logistics, and delivery.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

2. Mergers and Acquisitions Due Diligence

Prompt:

"Create a Mermaid diagram in a codeblock for the due diligence process in mergers and acquisitions, detailing steps like financial evaluation, legal checks, and operational analysis.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

3. **Enterprise Resource Planning (ERP) System Implementation**Prompt:
"Create a Mermaid diagram in a codeblock for ERP system implementation, covering steps like selecting software, customization, testing, deployment, and training.
Instructions:
- Do not use ```mermaid in your output.

- So it can be easily copied and pasted into a Mermaid-compatible environment."

4. Digital Transformation Strategy Development

Prompt:

"Create a Mermaid diagram in a codeblock to represent a digital transformation strategy development process, including steps like analyzing current processes, identifying digital opportunities, and implementing new technologies.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

5. New Product Development and Launch

Prompt:

"Create a Mermaid diagram in a codeblock for new product development and launch, featuring steps like market research, product design, prototyping,

testing, marketing, and launch strategy.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

6. Agile Software Development Lifecycle

Prompt:

"Create a Mermaid diagram in a codeblock for the Agile software development lifecycle, showing steps like planning, sprinting, testing, and deploying software in iterative cycles.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

7. Business Continuity Planning

Prompt:

"Create a Mermaid diagram in a codeblock for business continuity planning, including steps like risk assessment, strategy development, backup systems,

and disaster recovery plans.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

8. Advanced Machine Learning Model Deployment

Prompt:

"Create a Mermaid diagram in a codeblock for advanced machine learning model deployment, detailing steps like data preparation, model selection, training, validation, deployment, and monitoring.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

9. Global Marketing Campaign Execution

Prompt:

"Create a Mermaid diagram in a codeblock for executing a global marketing campaign, covering steps like strategy development, localization, multi-

channel coordination, execution, and performance analysis.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

10. Clinical Trial Management for Pharmaceuticals

Prompt:

"Create a Mermaid diagram in a codeblock for managing a clinical trial in pharmaceuticals, including steps like planning, participant recruitment, monitoring, data collection, and regulatory compliance.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

11. High-Level Negotiation Preparation and Execution

Prompt:

"Create a Mermaid diagram in a codeblock for high-level negotiation preparation and execution, detailing steps like research, strategy formulation,

stakeholder alignment, negotiation execution, and follow-up.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

12. Cybersecurity Incident Response Plan

Prompt:

"Create a Mermaid diagram in a codeblock for a cybersecurity incident response plan, including steps like identifying a breach, containing the threat, eradicating the cause, recovery, and lessons learned.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

13. Large-Scale Event Planning (Conferences, Trade Shows)

Prompt:

"Create a Mermaid diagram in a codeblock for large-scale event planning, such as conferences or trade shows, covering steps like budgeting, venue booking, marketing, registration, logistics coordination, and post-event

analysis.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

14. Corporate Financial Restructuring

Prompt:

"Create a Mermaid diagram in a codeblock for corporate financial restructuring, detailing steps like analyzing financial health, debt negotiation, asset liquidation, and strategic realignment.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

15. Hospital Patient Flow Management

Prompt:

"Create a Mermaid diagram in a codeblock for hospital patient flow management, including steps like coordinating admissions, transfers,

discharges, and optimizing staff allocation and bed availability.

Instructions:

- Do not use ``mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

16. Government Policy Development Process

Prompt:

"Create a Mermaid diagram in a codeblock for the government policy development process, covering steps like research, stakeholder consultation, drafting, approval, implementation, and review.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment."

17. Space Mission Planning and Execution

Prompt:

"Create a Mermaid diagram in a codeblock for space mission planning and execution, including steps like mission objective setting, spacecraft design,

testing, launch, mission operations, and data analysis.

Instructions:

- Do not use ```mermaid in your output.
- So it can be easily copied and pasted into a Mermaid-compatible environment.
