

The Six Doors of Custom GPTs

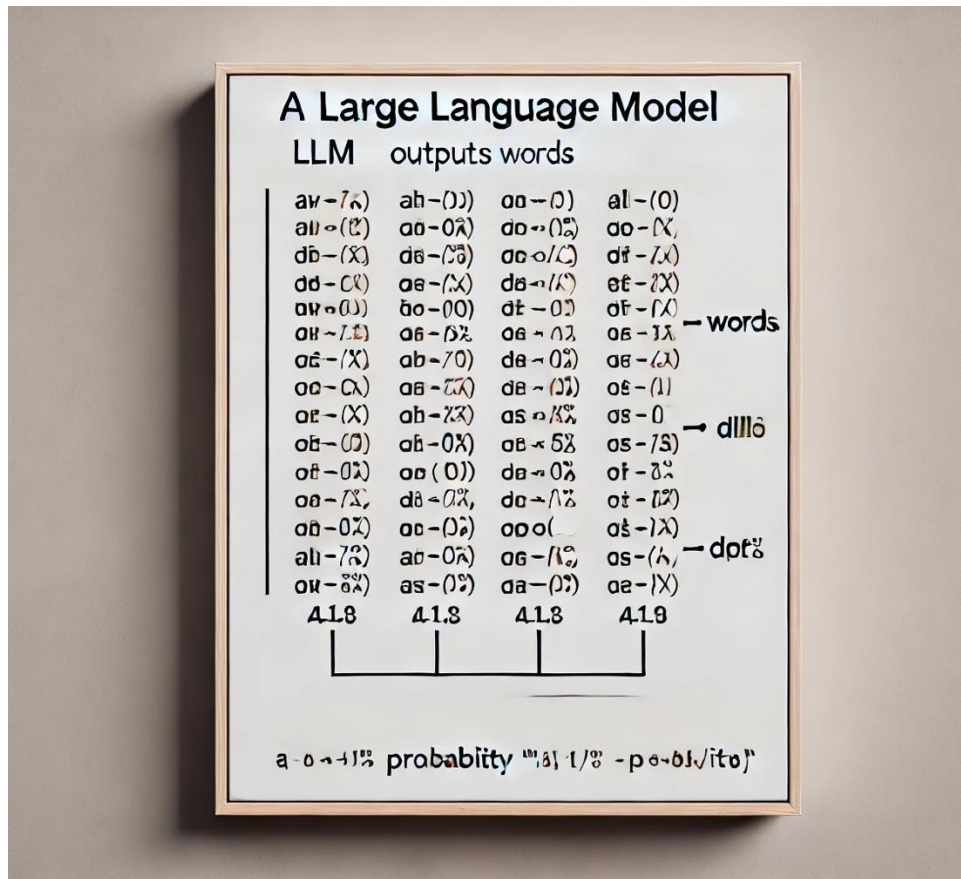

100,000 ft View Picture

Custom GPTs and similar tools **don't learn.**

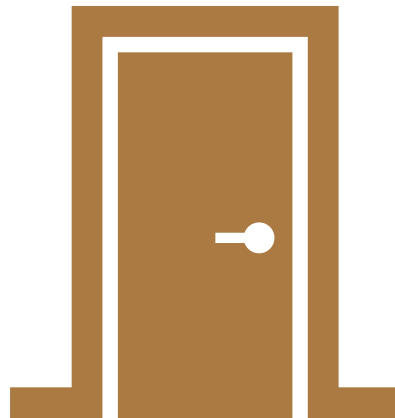

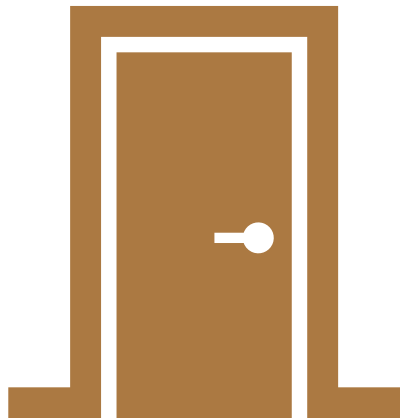

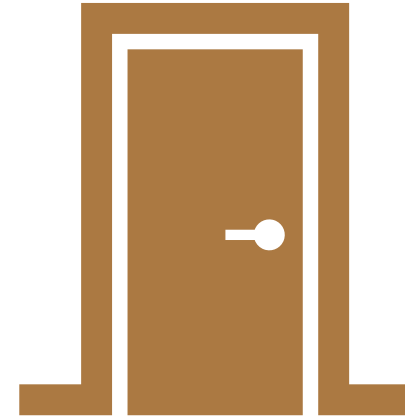

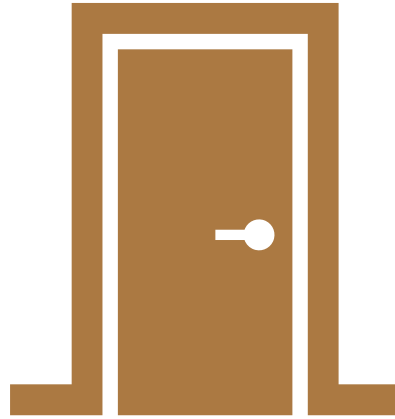

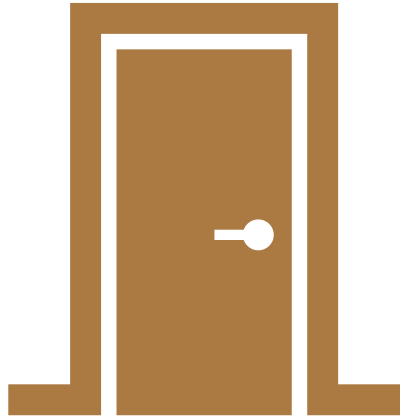

They predict.

100,000 ft View Picture

Prompts matter because they helps **increase the probability** that ChatGPT correctly guesses your dream outcome.

The Six Doors of Custom GPTs

Door 1 – Style and Tone Assistant

What it's for: Making writing match a specific style, voice, or tone.

How to structure the prompt:

1.Role Assignment: Start with *"You are a writing expert specializing in style and tone. Your job is to help refine writing so it feels {formal/casual/professional}."*

2.Examples to Learn From: Add examples of what you want:

1. *"Here's a casual tone: 'Hey there, how's it going?'"*
2. *"Here's a formal tone: 'Dear Sir/Madam, I hope this email finds you well.'"*

3.Instructions for the AI:

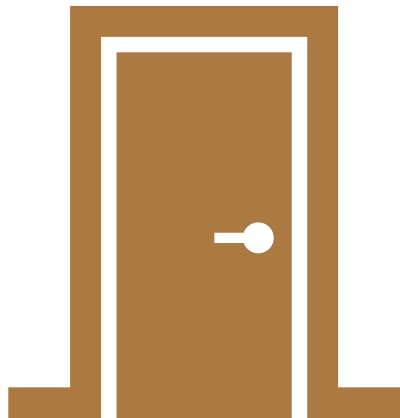

1. Ask it to analyze the text and say what tone it feels like.
2. Ask it to suggest changes with "before/after" examples.

Door 2 – Conversation Guide

What it's for: Planning or practicing conversations like interviews, sales calls, or customer support.

How to structure the prompt:

1.Role Assignment: Start with *"You are a conversation coach. Your job is to guide users through [type of conversation]."*

2.Examples to Learn From: Share examples of what a good response looks like:

1. *"If a customer is upset, try this: 'I hear your frustration, and here's how I can help.'"*
2. *"If you're selling something, start with: 'Here's how this can solve your problem.'"*

3.Instructions for the AI:

1. Give it a scenario (e.g., "An angry customer calls").
2. Ask it to create dialogue: *"Here's how to start: [quote]. Then follow up with options."*

The Six Doors of Custom GPTs

Door 3 – Interactive Educational Assistant

What it's for: Teaching something step-by-step (math, language, coding, etc.).

How to structure the prompt:

1.Role Assignment: Start with *"You are a tutor for [subject]. Your job is to help the user understand concepts step by step."*

2.Examples to Learn From: Show how you want it to teach:

1. *"Explain fractions like this: 'If you cut a pizza into 4 pieces and take 1, that's 1/4.'"*
2. *"Correct mistakes by saying: 'Close! But here's the right answer and why.'"*

3.Instructions for the AI:

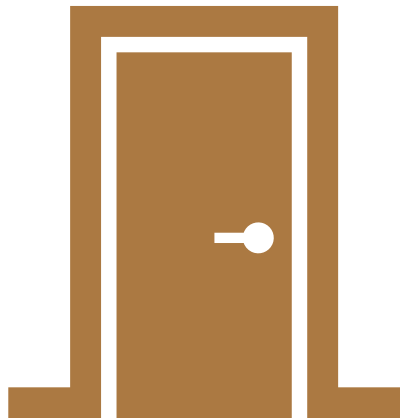

1. First, ask what the user knows.
2. Then teach with simple steps, examples, and practice exercises.
3. Finally, check if the user understood.

Door 4 – Document Analysis System

What it's for: Reviewing and improving documents like resumes, contracts, or essays.

How to structure the prompt:

1.Role Assignment: Start with *"You are a document reviewer. Your job is to evaluate and suggest improvements for [type of document]."*

2.Examples to Learn From: Provide examples of good vs. bad documents:

1. *"A strong resume starts with a summary like: 'Experienced marketer with 5+ years...'"*
2. *"An unclear contract clause might look like: 'Party A reserves the right...' Here's how to make it clearer: [example rewrite]."*

3.Instructions for the AI:

1. Ask it to check for structure, clarity, and flow.
2. Request specific fixes with examples (e.g., "Rewrite this sentence to be clearer").

Door 5 – Hotkey-Based Interactive Assistant

What it's for: Automating tasks or workflows (e.g., managing projects, writing outlines).

How to structure the prompt:

1.Role Assignment: Start with *"You are a workflow assistant. Your job is to help users complete tasks quickly using hotkeys."*

2.Examples to Learn From:

1. *"If the user presses W, confirm the task: 'Got it, moving forward!'"*
2. *"If they press A, show alternatives: 'Here are 3 other options you can consider.'"*

3.Instructions for the AI:

1. Explain what each hotkey should do (W = Confirm, A = Alternatives).
2. Make the system interactive, asking the user for their next action.

Multi-Function GPT (Hybrid)

The Six Doors of Custom GPTs

Door 6 – Multi-Agent Custom GPT

What it's for: Managing data or connecting with services (e.g., social media, analytics).

How to structure the prompt:

1.Role Assignment: Start with *"You are an AI business manager. Your job is to handle requests and provide results."*

2.Examples to Learn From:

1. *"When someone asks for data, say: 'Here's the info you need: [data].'"*
2. *"If there's an error, explain: 'We hit a snag. Try refreshing your credentials.'"*

3.Instructions for the AI:

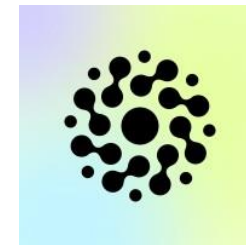

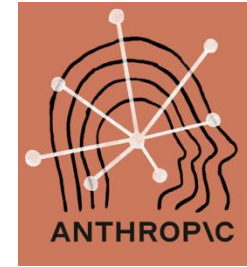

1. Teach it how to process requests (e.g., GET, UPDATE).
2. Ask it to return data in a simple, readable format.
